

The news is out there: MS Teams Unbundle

MICROSOFT / TECH

Microsoft is unbundling Teams from Office in Europe to address regulator concerns

Microsoft tells partners unbundling Teams is a 'compromise' with the EU

Microsoft to unbundle Teams software in Europe in bid to abate EU antitrust concerns

Government & Policy

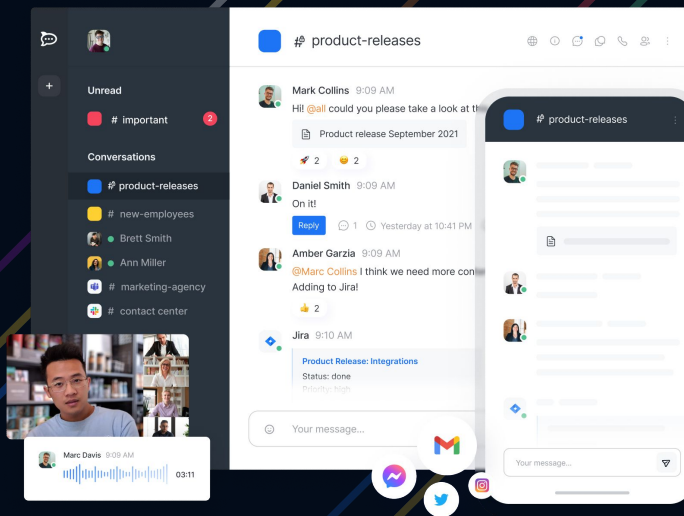

Microsoft unbundles Teams from Microsoft Office in Europe to appease regulators

The move comes a month after the European Commission launched a formal antitrust probe

Looking for a **more secure**
alternative?

Introducing Rocket.Chat

Secure and compliant collaboration platform.
Own your data, customize anything, integrate everything.

Advanced non-siloed team collaboration

Enable teams to securely and effectively interact with each other, partners, or any external organization from a single platform. Reduce context switching, increase transparency and speed up work.

Administrators at even the largest of organizations can manage Rocket.Chat workspace and users with precise, smart controls.

Backed by enterprise-grade security for highly-regulated environments

Your data's security is our priority. Communicate with peace of mind thanks to premium compliance and advanced user management features.

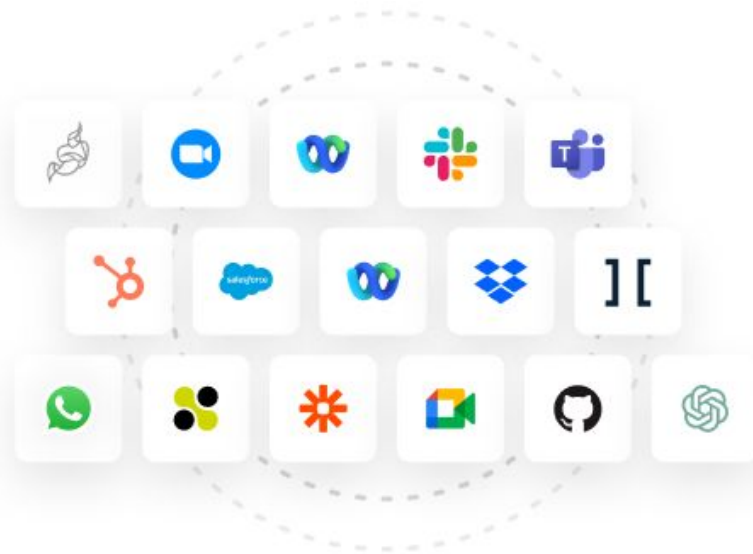

- 01 Self-managed, air-gapped and secure cloud deployment for a complete ownership of your data
- 02 Compliant with GDPR, OZG, HIPAA, FINRA, FedRAMP and more
- 03 180 + customer roles and permissions mapped to your org structure
- 04 Advanced AD/LDAP user and group sync
- 05 E2E Encryption
- 06 Message auditing and reporting
- 07 Data loss prevention
- 08 Mobile device management

Flexible and extensible to fit your unique business needs

Say goodbye to app-switching chaos. Rocket.Chat seamlessly integrates with numerous third-party apps and services, making your workflow more efficient.

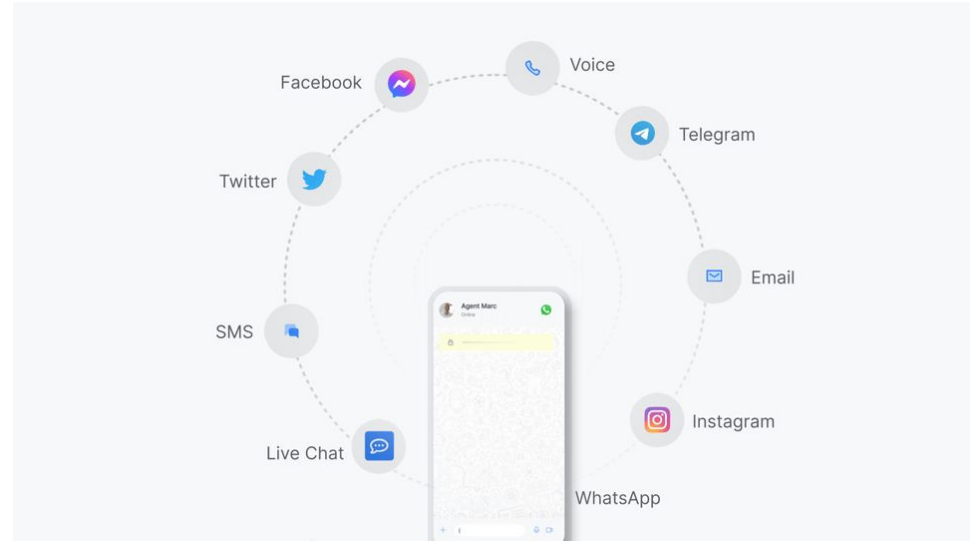

Don't see the app you need in our marketplace? Extend and build custom integrations in weeks with our APIs and app framework.

Omnichannel communications

Accelerate time to value by rapidly implementing agent-assisted and automated omnichannel strategy regardless of your team size.

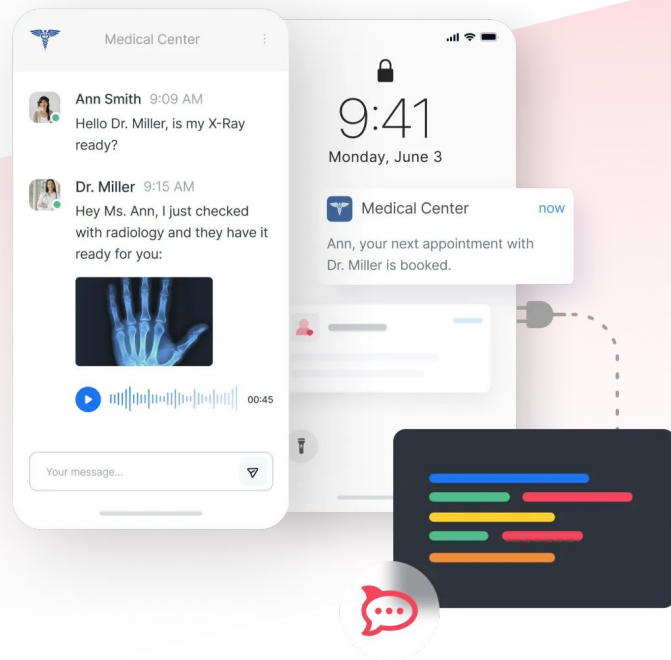

Enable your teams with a single interface to communicate with each other and assist large external audiences, whether customers, students citizens, or patients.

Embeddable to your mobile or web app

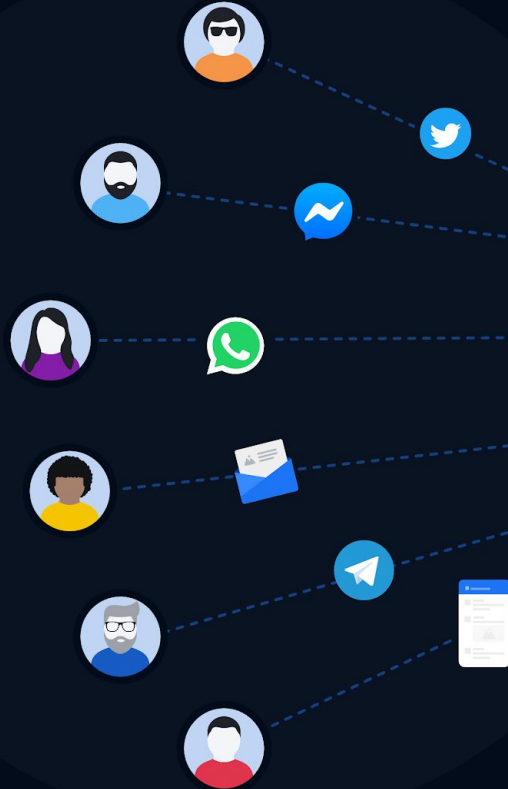

One size doesn't fit all, and that's where Rocket.Chat shines. Leverage our chat APIs to embed custom chat experiences into your existing platform.

Power high-volume messaging on our scalable infrastructure built for security and reliability.

Audi Business Innovation

- Self-hosted, open-source solution for secure internal communication **resulting in 1/3 cloud costs saved.**
- ChatOps: speed and open communication instantly alert them to any issues with their tools, improving the quality of their service.
- Seamless collaboration with other teams and companies within VW Group.

“Rocket.Chat really speeds up the process of collaborating with our external partners, as well as internally. It allows us to share information really fast, very effectively, and in different ways.”

Stefan Teubner

IT Project Leader, Audi Business Innovation GmbH

City of Cologne

- **Secure collaboration for 20,000 employees** distributed across **9 departments** in **50 cities.**
- Integrated, decentralized communication across the city-owned companies and the internal teams for all-around, unified management.
- Citizen engagement via their preferred channels.

“We wanted to give everyone the freedom to connect with each other securely. We needed a tool that could bring us together again. Luckily we found one with Rocket.Chat.”

Rene Jahnke

Solution Architect, the City of Cologne

Why privacy-conscious German universities choose Rocket.Chat?

⁰¹ **Ole Petersen**, IT Coordinator at
Berufliche Schule Hamburg-
Harburg

Rocket.Chat became the central communication
platform for the entire school community

Rocket.Chat is a great communication platform for any
school, thanks to its simple design, integration options,
and data security.

⁰² **Thomas Nau**, Deputy Director
Communication and Information
Centre (kiz) at Universitaet Ulm

We looked at various options, but Rocket.Chat matched all
of our criteria

Rocket.Chat has proven to be quite adaptable when it
comes to finding the best answer to an issue. It was very
simple to integrate and set up as a platform.

⁰³ **Patrick Holz**, Head of Customer &
Web Support department,
University of Cologne

Rocket.Chat is a solution we can completely rely on
It's compatible with our infrastructure and meets our
legal and security standards. Therefore, I would
strongly recommend other educational institutions to
use it.

Thank you!
